

meta programming and model pdf

The methods of neuro-linguistic programming are the specific techniques used to perform and teach neuro-linguistic programming, a pseudoscience which teaches that people are only able to directly perceive a small part of the world using their conscious awareness, and that this view of the world is filtered by experience, beliefs, values, assumptions, and biological sensory systems.

Methods of neuro-linguistic programming - Wikipedia

A metamodel or surrogate model is a model of a model, and metamodeling is the process of generating such metamodels. Thus metamodeling or meta-modeling is the analysis, construction and development of the frames, rules, constraints, models and theories applicable and useful for modeling a predefined class of problems. As its name implies, this concept applies the notions of meta-and modeling ...
