Systems Simulation: The Shortest Route to Applications. This site features information about discrete event system modeling and simulation. It includes discussions on descriptive simulation modeling, programming commands, techniques for sensitivity estimation, optimization and goal-seeking by simulation, and what-if analysis.

History. Intel initiated IBIS in the early 1990s. Intel needed to have all of its divisions to present a common standardized model format to its external customers. This prompted Intel to solicit EDA vendors to participate in the development of a common model format.

Sparse Approximation (also known as Sparse Representation) theory deals with sparse solutions for systems of linear equations. Techniques for finding these solutions and exploiting them in applications have found wide use in image processing, signal processing, machine learning, medical imaging, and more.

Articles. 30 Dec 2011. NURBS and CAD: 30 Years Together. Dmitry Ushakov. In the outgoing year engineering celebrates a remarkable anniversary – thirty years of industrial use of Non-Uniform Rational B-Spline (NURBS) for modeling 3D curves and surfaces. In August 1981 an American aircraft concern Boeing proposed to embody NURBS in IGES industrial standard.
