modular approach toward multifunctional pdf

Modular design, or "modularity in design", is a design approach that subdivides a system into smaller parts called modules or skids, that can be independently created and then used in different systems. A modular system can be characterized by functional partitioning into discrete scalable, reusable modules; rigorous use of well-defined modular interfaces; and making use of industry standards ...

Abstract. Nanomaterials offer new opportunities for cancer diagnosis and treatment. Multifunctional nanoparticles harboring various functions including targeting, imaging, therapy, and etc have been intensively studied aiming to overcome limitations associated with conventional cancer diagnosis and therapy.

Overview. Launched with a Mission Needs Statement in 1997 and a subsequent requirements document in 1998 (which was revised several times), JTRS was a family of software-defined radios that were to work with many existing military and civilian radios. It included integrated encryption and Wideband Networking Software to create mobile ad hoc networks (MANETs).

November 3/18: Viper instead of F-35? Taiwan's air force is hoping that the US approves its requested purchase for new F-16V fighter jets. The air force sees the F-16V as a platform that would increase the country's air defense capabilities, while also being a cheaper alternative to the costly F-35.
