A PT boat (short for patrol torpedo boat) was a torpedo-armed fast attack craft used by the United States Navy in World War II. It was small, fast, and inexpensive to build, valued for its maneuverability and speed but hampered at the beginning of the war by ineffective torpedoes, limited armament, and comparatively fragile construction that limited some of the variants to coastal waters.

Timber remains the most common material for the construction of boats under 15 metres in length. There has been a change towards fibre-reinforced plastic in most developed countries and some developing countries but, in Africa, Asia and the Pacific, probably more than 90 percent of small fishing vessels are built of wood. The cost advantage of timber versus other materials is still sufficient ...

REDWING 18 is based on a Chappelle design of traditional construction. I saw a review of the design in WoodenBoat Magazine (No.82) and set to dreaming about a cruise in the backwater marshes of the Chesapeake's Eastern Shore. Many of these back waters are too narrow for a sailboat to tack but are passable with a small power cruiser.
